

C-ROADS PLATFORM

Martin Böhm
General Secretary

C-Roads Platform

Violeta Bulc @Bulc_EU · 19h

I want to see cooperative vehicles on #EU roads in 2019. The C-ROADS platform will make it happen! #realITS

👤 EU Transport and INEA

The aim of the C-Roads Platform

- linking all C-ITS deployments
 - development of commonly agreed specifications taking the EU-C-ITS Platform recommendations into account
 - planning intensive cross-testing to verify interoperability
- ➔ And by doing so C-Roads will pave the ground for making Cooperative, Connected and Automated Driving reality

C-Roads Core Members

C-Roads Associated Members

- Finland
- Hungary
- Ireland
- Switzerland

- Australia and New Zealand

General Principles

Member States agree to work together to achieve deployments that enable interoperable and seamless cross-border C-ITS services for European travelers. Hereby the general principles of the C-Roads Platform are agreed as follows, which reflect EC's expectations completely:

- The main goal is to link C-ITS pilot deployment projects in EU Member States,
- to develop, share and publish common technical specifications (including the common communication profiles),
- to verify interoperability through cross-site testing,
- and to develop system tests based on the common communication profiles by focusing on hybrid communication mix, which is a combination of ETSI ITS-G5 and operational cellular networks.
- The details of the day-to-day cooperation in the C-Roads Platform are laid down in the Terms of Reference (ToR).
